HYSTER UT SERIES

4-WHEEL ELECTRIC FORKLIFT

J1.5-3.5UT / 1500-3500KG

[HYSTER.COM.AU](https://www.hyster.com.au)

FEATURES

1 HIGH STRENGTH OVERHEAD GUARD

The overhead guard features profiled steel, with high strength materials to enhance reliability and operator protection.

2 LOW STEP HEIGHT

The conveniently positioned low step provides easy access to the truck.

3 AC CONTROLLER

European designed AC controllers coupled with AC traction and hydraulic motors allow for precise truck controllability. The controllers are easily accessible which can also minimise service time.

4 SMALL STEERING WHEEL

The adjustable steering wheel position provides convenience for the operator as it provides 8 degrees of adjustment. Low steering effort makes it easy to operate in confined spaces.

5 INTEGRATED MOTOR, TRANSMISSION AND AXLE

The compact structure of the drive system provides adequate access for maintenance. Precision cut gears are incorporated, leading to reduced wear and lower noise levels.

6 WIDE VIEW MAST

The wide view mast can significantly improve the operator's forward field of view, providing an increase in comfort and safety.

OVERVIEW

THE HYSTER® UT SERIES PROVIDES THE IDEAL SOLUTION TO MEET YOUR LESS FREQUENT USAGE NEEDS, WITHOUT COMPROMISING ON PERFORMANCE.

The Range

The J1.5-3.5UT range is available in six different capacities:

1,500KG – J1.5UT / 1,800KG – J1.8UT

2,000KG – J2.0UT / 2,500KG – J2.5UT

3,000KG – J3.0UT / 3,500KG – J3.5UT

Design

The design of the UT range has been engineered with the driver in mind. The ergonomically designed operator compartment, with a familiar layout, means that drivers will be able to work effortlessly. A range of standard features and options help to ensure the truck is configured to the needs of the application.

Low Cost of Ownership

The use of high quality and robust components contribute to reliable operations and lower wear and tear. This, together with fast availability of cost-effective replacement parts helps to reduce maintenance requirements and costs.

Hydraulics

High quality cylinders with hard chrome rods reduce seal wear for long life. A full-flow, low pressure filter on the return line keeps the hydraulic oil clean, which helps to minimise seal and pump wear. In addition, this keeps the control valve in good condition, leading to low service costs.

ENGINEERED FOR DRIVERS

Safety and Compliance

- High visibility mast with soft landing as standard to absorb shocks
- Controlled mast lowering speed avoids damaging goods
- Secure overhead guard passed CE drop test and safety standards
- LED lights as standard
- Operator presence system provides increased operator safety
- Sequential seatbelt interlock feature and travel speed limiting with mast elevated available for Australia

Comfort

- Hydraulic power steering requires low steering effort without kick-back which allows for precise positioning
- Full suspension seat reduces driver fatigue
- Adjustable steering column and seat to suit all operators
- Low entrance step and large floor space
- Ergonomically designed hand brake

Performance

- Simple and clear display of speed, power, error code, working hours ensure that the operator is fully informed
- The latest colour display integrated with functions such as performance selection allows the operator to configure the truck to meet different application requirements
- AC traction and lifting motors, with electronic control delivers a high level of performance

Service

- AC traction and hydraulic motors reduce maintenance cost
- IP54 design ensures reliability
- The controller assembly is mounted inside the counterweight and is protected by an easy to remove cover
- CANbus communication simplifies troubleshooting
